

USE OF CAMERAS ON SCHOOL BUSES

In order to promote school bus safety for students attending the public, private and parochial schools in the Nashua School District the Board of Education empowers the Superintendent of Schools to utilize security cameras on those bus routes under the jurisdiction of the District. Security cameras may be utilized on those routes where the behavior of riders is such that the regular methods of discipline have failed to insure a safe bus ride to and from school. All media will be used in a manner that is consistent with protecting the confidentiality of persons pictured. Students may be suspended from riding the bus in accordance with RSA 189:9-a.
